SIMPLE BRANDBAR

HAVING YOUR OWN "BRANDBAR" NEVER BEEN EASIER!

Made with a lot of love by **Jandeilson De Sousa**

I.   Installation

1. To install your Simple BrandBar inside your server you must first unzip the file "*SimpleBrandBar.zip*" within the server directory you want your links work.

Example directory: ***your_server/your_folder***

* keep in mind that the address of your links should look like this: ***http://your_server/your_folder/link***

2. Edit the file "**config.php**" in any text editor with information from your MySQL database. The file is located in the root of the Simple BrandBar (ex: *your_server/your_folder).*

```
/** MySQL database */
$dbname = "PUT YOUR DATABASE NAME HERE";

/** MySQL database username */
$username = "PUT YOUR DATABASE USERNAME HERE";

/** MySQL database password */
$password = "PUT YOUR DATABASE PASSWORD HERE";

/** MySQL hostname */
$servername = "PUT YOUR DATABASE HOSTNAME HERE";
```

* Put your information between the quotes being careful not to remove them.

3. Your installation is almost ready! Now go to:
http://your_server/your_folder/install

Simple BrandBar successfully installed!

Any problem, please contact us.
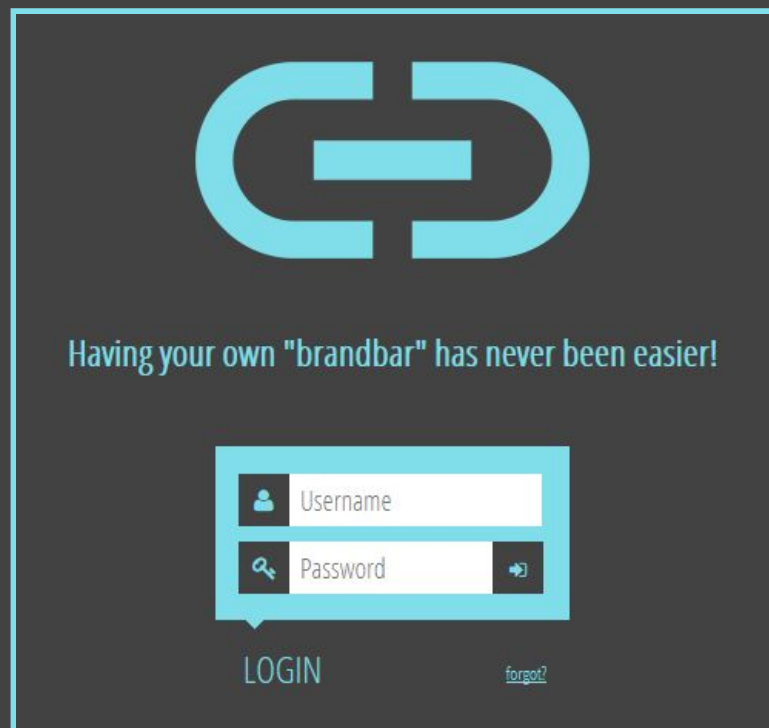

Support

If the above message appeared, it means your Simple BrandBar has been successfully installed.

* Recommend you delete the /install folder on your server after installation.

Made with a lot of love by **Jandeilson De Sousa**

4. Now go to your admin panel: *http://your_server/your_folder/admin*

Having your own "brandbar" has never been easier!

👤 Username

🔑 Password ➡

LOGIN   forgot?

The default username and password is:
Username: simplebrandbar
Password: simplebrandbar

Recommend that you change the default username and password as soon as possible. "IV. Simple BrandBar Security" teach you how.

In your administration panel go to **Settings** » **Your Site Details** and fill in the fields with your information.
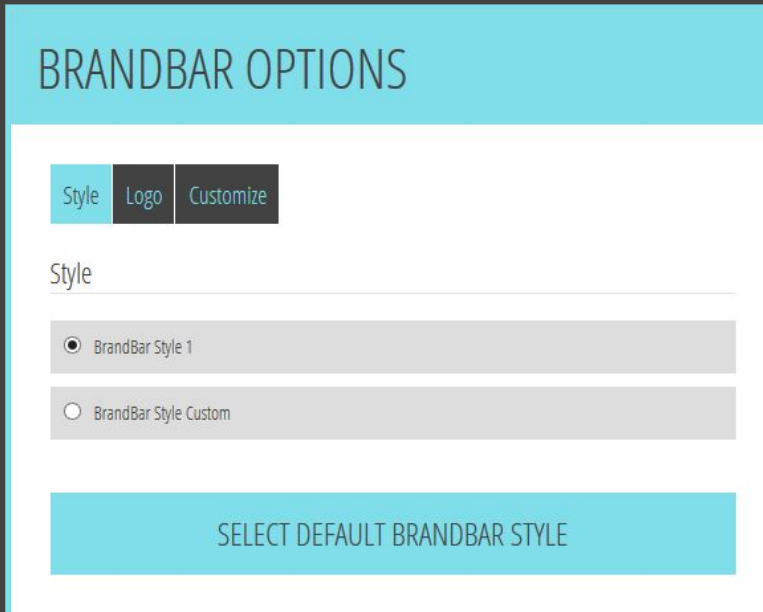

YOUR SITE DETAILS

Your site Name (ex: Simple BrandBar)

Your site Description (ex: Awesome Simple Brandbar)

Your site URL (ex: http://processo21.com)

SAVE YOUR SITE DETAILS

Made with a lot of love by **Jandeilson De Sousa**

Now your Simple BrandBar should work correctly.
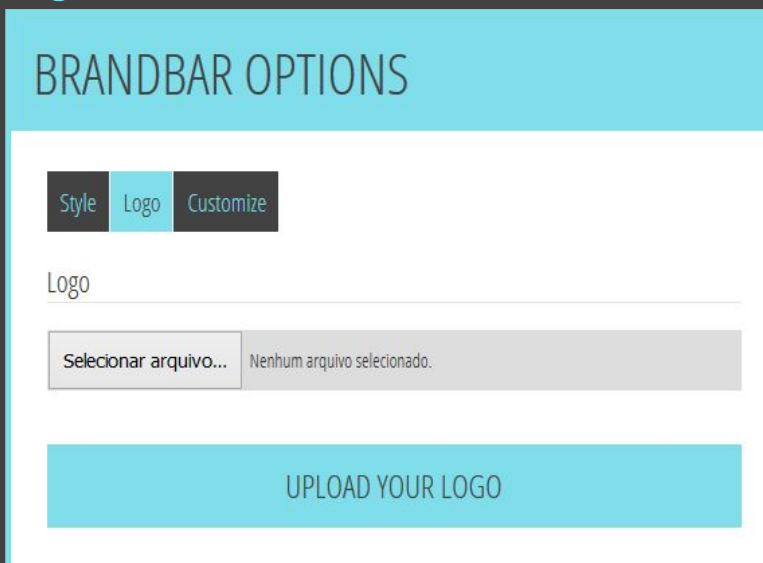

II.   Simple BrandBar Options

Style

You can choose which style to use.

Logo

Choose any logo you want and upload it to your server.

Costumize

BRANDBAR OPTIONS

Style | Logo | Customize

Customize

BrandBar Style 1 ⌄

Button & Style

Insert here any Font Awesome icon. (ex: fa-shopping-cart)

Insert here any Name you want. (ex: Purchase Now!)

Insert here any URL you want. (ex: http://processo21.com)

Insert here any Color you want. (ex: #00ffff or cyan)

CHANGE YOUR BRANDBAR STYLE OPTIONS

Select the BrandBar Style you want customize.

You can customize the button and color "BrandBar Style 1" as you want:

1. **Box:** Put the icon name you want.

   Icons are provided by Font Awesome. You can check out all in: http://fortawesome.github.io/Font-Awesome/icons

2. **Box:** Put the text you want for your "call to action" button.

3. **Box:** Put the link you want your button directs people.
4. **Box:** Put the color you want for your bar.

   Type the color you want code in HEX, RGB, RGBA or NAME. We recommend: http://www.materialui.co/colors, for their excellent colors of Material Design.

III.   Simple BrandBar Custom Style

The process of creating a BrandBar Custom Style is very simple since you have some web programming skills.

Necessary basic skills:

Basics of web programming;
HTML;
CSS.

To create your BrandBar Custom Style you need to write the code you want in the following files within the directory Simple BrandBar located:

your_folder/inc/bars/ **- barCustom.php** (put in this file the HTML of your BrandBar Custom Style)
your_folder/css/bars/ **- barCustom.css php** (put in this file the CSS of your BrandBar Custom Style)

If you want to use some scripts, use informed space in the file: your_folder/js/ - **scripts.js**

IV.   Simple BrandBar Security

We recommend you change the username and password of your admin panel, to do this change the file: your_folder/admin/ - **security.php**

With any text editor erase "**simplebrandbar**" of both fields and set the username and password you want inside the quotes.

```php
/** Put any username you want between the quotes */
$username = "simplebrandbar";

/** Put any password you want between the quotes */
$password = "simplebrandbar";
```

* Put your information between the quotes being careful not to remove them.
